

Welcome. Passenger Safety and Protection is our Priority

We have put in place many new measures for your safety and protection. Only those passengers travelling should enter the Terminals, be it the Check-in, Departures or Arrivals areas.

Social Distancing

To maintain social distance, we have applied floor markings to indicate the appropriate distance to queue or stand.

Continuous Cleaning

To maintain the highest hygiene standards, all facilities and services throughout the Departures and Arrivals areas are cleaned and disinfected continuously throughout the day.

Hand Sanitisers

Hand sanitiser dispensers are widely available and signposted across Dublin Airport. Other individual hand sanitiser products can also be purchased throughout your airport journey.

Face Masks

Please wear a face mask during your full airport journey and please bring your own face mask from home. However, if you forget, face masks are available to purchase from vending machines and other outlets at Dublin Airport. Please dispose of your face masks after use in the general waste bins.

Security Screening

We have installed plexiglass screens at close contact points, and we ask that passengers wear a face mask, use hand sanitiser before and after Security and follow the floor markings to maintain social distancing. Equipment and trays are frequently disinfected for your use. The rest of the Security screening process remains the same, so please prepare as usual.

Seating

To maintain social distance, we have limited the number of seats available at the boarding gates and in the food & drink outlets, and we are prioritising seats for passengers with reduced mobility, families travelling with young children or women travelling while pregnant. Families are permitted to sit together.

Plexiglass Screens

We have installed plexiglass screens for whenever there are close contact points between passengers and staff, be it at Security, Shopping, Cafés and Restaurants.

Food & Drink

The Cafés and Restaurants that are open have a range of options that cater to your needs; from table service to convenient grab & go offers with social distancing, actively managed by staff and floor markers. We have also installed plexiglass screens and there is a continuous cleaning regime throughout.

Shopping

To help you avail of the great shopping discounts on leading premium brands in-store, we have re-organised your Dublin Airport shopping experience, so it is contactless and maintains social distancing.

Car Parks

We recommend that you book in advance online. We have made the car parks contactless, from payments to entry and exit and we have applied social distancing markers on the Red Express car park shuttle buses and in the bus shelters. We have also installed many hand sanitiser dispensers throughout.
