

# PARK SMART

## SECURE YOUR VEHICLE

### TRACE, LOCK, COVER

*Give your motorcycle a little 'TLC'*

1. Trace - Fit a tracking system
2. Lock - Use good standard security products
3. Cover - Covering your bike makes it harder to steal, time-consuming for the thief
4. Always use the steering lock and remove the ignition keys
5. Fitting an alarm and immobiliser can be a deterrent to thieves
6. Keep your motorcycle, moped or scooter in your garage or shed where possible
7. If street parking, secure it to a permanent structure where possible
8. Park under street lights
9. Consider parking where there is CCTV
