

### North Runway Construction Package 1 Update

Since the commencement of Construction Package 1, substantial works have taken place to prepare the site for North Runway and to realign and build new roads in the vicinity of Forrest Little and St. Margaret’s Bypass. Drainage and other utility works continue, along with roads surfacing, fencing and landscaping.

Over 8km of fencing has been installed along the perimeter of the North Runway site, and works are nearing completion on the Forrest Tavern monument at its new location opposite the Boot Inn on the R108.

All works comply with the Construction Environmental Management Plan which includes dust suppression, road sweeping and environmental monitoring, amongst other measures. Where works take place on or adjacent to public roads, temporary traffic management measures continue in order to ensure the safety of staff and road users.

Further project updates and roadworks notifications can be found [here](#).

Since our last update, site activities have progressed apace...

Average number of staff on site	59	Road sweepers deployed	157
Total number of staff on site to date	313	Ornithologist’s site inspections	12
Total hours worked	75,198	Bat specialist’s site inspections	6
Night and out-of-hours worked	4 days	Archaeologists on site per week	16

A selection of images from the site works can be found below.

Engagement with members of the public, particularly our neighbours and local communities, continues to be a priority for daa and the North Runway Team. If you have any queries or would like further information about any aspect of the project, please contact us on Freephone 1800-804422 or [northrunway@daa.ie](mailto:northrunway@daa.ie).
