
Temporary Traffic Management Measures on a Section of R108 and Forrest Little Road

29 August – 30 November, 10am – 4pm and 7.30pm – 5am

In order to facilitate resurfacing of part of the R108 and Forrest Little Road, it is necessary to implement temporary traffic management measures on short stretches of these roads, as indicated on the map below. The works will be completed in the indicative staggered tranches below, weather permitting.

- A – 29 August – 15 September
- B – 9 September – 13 October
- C – 6 October – 4 November
- D – 24 October – 14 November
- E – 3 November – 30 November

Works will be undertaken in the safest and most efficient manner in order to minimise any potential disruption to road users. For this reason, works will take place during off-peak and night periods when roads are quieter (10am-4pm and 7.30pm-5am). There will be no works undertaken at weekends or bank holidays during the above periods.

A single-lane, stop/go system will be in operation and all necessary traffic management measures will be in place to ensure the safety of the public and staff, and to reduce the impact on road users as much as possible.

We apologise for any inconvenience these measures may cause.
